# A family run business since 1966

We spend an astonishing third of our lives in the bedroom, so it's vital to create the perfect atmosphere for a restful nights sleep.

However, with space now at a premium why can't the bedroom be a multi-functioning space especially with our ingenious storage solutions? As far as choosing a bedroom is concerned, I think it should be an inspirational, rewarding and enjoyable experience.

Above all, I believe there's no reason why it can't be a bedroom from Dean House Interiors. To some people the bedroom may well be just another room however, my design team are passionate about making this space as individual as you are, whether it is the sumptuous master bedroom, loft space, home office or walk-in closet.

Each bedroom visibly reinforces the care and attention given to every detail, upon which we have built our reputation over the past forty years.

Dean House Interiors are recognised as the leading specialist in the design and manufacture of fitted bedrooms. A combination of craftsmanship, exquisite design and the finest materials means choosing a bedroom from Dean House Interiors will be one of the best decisions you'll ever make.

Our philosophy is simple; "To craft bedrooms of excellence and superior design at an affordable price". So why not indulge yourself for a moment, let your imagination run riot – I am confident that by the time you've turned the last page, you won't want to wait any longer.

# Find time to dream about your perfect bedroom

A bedroom should be a haven from the chaos of life, a place to relax and unwind. We endeavour to bring you that tranquillity and peace by creating your ideal sanctuary away from the stresses of modern living but, it's hard to feel serene when you're tripping over shoes and searching through that overstuffed closet for your favourite accessory.

## A few things to think about

If you currently have freestanding furniture, such as wardrobes, drawers and dressing tables, it's more than likely that your bedroom is full of bags, boxes, bins, baskets and has cluttered floor space. Even the tidiest people have possessions that come in all shapes and sizes, it's almost impossible to store everything away.

**Clearing out what's redundant.** It can be an uplifting experience when you recycle whatever is unused, unworn, unread and unwanted. You not only free up space, you liberate your whole attitude.

**Editing your wardrobe.** It can be an excellent idea to edit your wardrobe. Statistics say, "people tend to wear 20% of their clothes 80% of the time." That means the bulk of your clothing is gathering dust. Now is the perfect time to size things up. If you have not worn it for a few years you are not going to miss it.

So why not donate those unwanted items to a charity shop or dispose of it in an environmentally friendly way at the recycling centre. With that done you should now be forming a clear idea of exactly what you need in terms of hanging and storage space.

**Hang with the best.** Treat your remaining clothing with respect; padded hangers keep sweaters from losing their shape, clip-style hangers designed for trousers and skirts will prevent creasing, and hangers made from wood or heavy-duty plastic are low-cost luxuries that will make a vast difference.

**A Dean House Interiors bedroom** will help you to maximise your space because we understand that every bedroom is individual, which is why we measure everything up and then tailor your bedroom furniture to your exact specifications.

# The built-in solution

Built-in arrangements instantly generate a feeling of spaciousness, with hardworking runs of ingenious storage solutions which offer a neater, more integrated appearance. We all spend on average, 8 hours of each day in our bedrooms. So it's well worth considering exactly how you would like your bedroom to be.

We offer clever storage solutions which are designed to maximise the space you have to keep all your bedroom clutter at bay.

## Creating the ambience

**Colour** has always been important from natural warning signals in primitive times to enhancement of the habitat in the form of our homes. A bedroom colour scheme needs to be predominantly soft and soothing; pale tones will produce a more tranquil, serene and relaxing atmosphere, however, you can select a bold accent colour to create a little drama. Introducing interesting textiles with textures will give a more luxurious feel to your room. The use of dimmer switches can also have a dramatic effect on the mood of a room.

**The overall design** needs to be sympathetic to the style of your property. The secret is to make clear decisions and to work within the existing architectural outline of your home.

**Keep a window open** to let the air in and to prevent your bedroom from becoming stuffy. The burning of essential oils such as lavender, patchouli or ylang ylang can aid relaxation and will also make your bedroom smell fabulous.

# E

# xcellence comes as standard

The cabinetry is a premium feature of all Dean House Interiors furniture. We are immensely proud of its construction; it has been painstakingly engineered to give you enduring excellence.

## Cabinet construction

A cam and dowel system for excellent strength and durability with dust free, fully enclosed cabinets.

Cabinet options:

- 1 *Internal drawer chest options*
- 2 *Long hanging for special dresses and winter coats*
- 3 *Double hanging to organise suits and separates*
- 4 *Internal open shelf unit with 5 sections*
- 5 *Internal open shelf unit with 3 sections*

# Maximise your space

Whatever style you choose, you can be sure that behind the scenes we can bring order to your life. Our extensive collection of interiors can help you to stay clutter free, with everything close to hand. Many combinations of shelving, hanging and drawers are available. The only limit is your imagination.

# ndulgence

The possibilities are infinite with the Indulgence collection. This collection just goes on delivering endless design and storage options. It's so amazingly adaptable. If light and spacious is the feel you desire, then Indulgence is for you. This collection can be personalised to suit your own taste and lifestyle. Shown here with long brushed stainless steel handles, setting off the beech finish magnificently.

# Indulgence loft conversion

Not just a bedroom, it's a playroom, study and a home entertainment area. Pretty astounding use of what was once an untapped resource! A loft is often the largest untapped space in your house, and having it converted is easier, less expensive and quicker than having an extension – and you won't lose any of your garden space either. It can also significantly raise the value of your home!

A place for everything and everything in its place. Your children could have their own self-contained retreat to entertain and study, and quite literally grow into the space. Let us help you achieve a children's room you can be proud of.

# Indulgence home office

If you are spending 15-20 hours of the week and an ever growing proportion of your hard-earned salary commuting to and from work, a home office could liberate you from that daily grind and expense.

As much as you like closing the door at the end of a hard days work, it could be an absolute pleasure to start work again in the morning and your commute is now just across the landing.

# Opulence

If your wish is to create a room that's really something quite special then this collection is for you. Inspired by Edwardian design this extremely palatial range really does have it all. Its classic design is enhanced with ornate features such as the subtle detailing on the wardrobe pilasters. Finished with its own decorative cornice allowing you to create a bedroom of true opulence.

# O pulence linen press

# T ranquillity

The neutral palette of Tranquillity in soft white with frosted glass feature doors, gives a sense of uncluttered serenity and peace. On the other hand, once you add a splash of black with a dash of pink, you have a whole different story, more playful and cheeky. You can be as creative as you like by simply adding the accessories and accent colour scheme.

You can change the ambience as often as you please, yet the classic bedroom layout that our designers at Dean House Interiors have created will carry on long into the future.

# Splendour

There's nothing better than our Splendour collection to exude Hollywood glamour. The ivory satin drawer and door panels contrast perfectly with the deep chocolate tones of the walnut frames. The proportions of the furniture with its wide practical drawers along with extensive storage is just the thing to accommodate all those designer labels, what more could anyone wish for.

# Elegance white

The crispness and purity of the Elegance collection is as fresh as white linen drying on a summer's day. If you are a traditionalist at heart then this is the bedroom for you. The tongue and groove effect has been used in furniture since cabinet making began, the proof that good design never dates.

The light relief of vertical glass panels gives a truly elegant effect, however, don't be fooled, this bedroom also works wonderfully well in a modern interior.

# Elegance beech

Our designers at Dean House Interiors are passionate about creating attractive, alternative design solutions. The midnight black glass, highlights the symmetrical lines of the beech doors to perfection.

## Elegance cream

Elegance in cream gives a traditional, romantic and elegant atmosphere, just the thing for your bedroom. The texture of the glass panels complements the soft, delicate tones.

# Romance

Versatility is very much the order of the day with this collection. Its simple styling will never date, allowing complete flexibility in its look. You may favour the uncluttered clean lines for a more contemporary feel or decide instead to easily create a really romantic look with a few well-chosen accessories.

# Timeless

The Japanese paper panelled room was the inspiration for the Timeless collection. Here East meets West in a true fusion of style. The crafted precision and symmetry of the three opaque glass panels gives an impressive airy solution to any interior. If you require form and function with plain and simple styling, whilst still achieving a sleek and stunning bedroom, then look no further.

# nfinity

Infinity – a sophisticated collection of hi-gloss bedrooms, oozing elegance and style. The simplicity of a contemporary Infinity bedroom will never date, quite simply, it's appeal is timeless.

# Sophistication

Our Sophistication collection provides the ultimate in style and chic allowing you to create your very own designer bedroom as shown here with the cool cream satin warmed by the varied tones of Zebrano.

# Sophistication

Capture a real sense of drama by choosing the black option in this stunning collection and introduce a touch of class and sophistication to your bedroom.

# Sensation pear

Short of space? Not a problem! This design is undeniably boxing clever. The resting area has been ingeniously planned with a bridging unit over the bed to incorporate smart storage for a surprising number of belongings. Quite literally built around you, without impinging on any of the spatial quality. Nothing in this bedroom design has been compromised, and we firmly believe, neither should you.

# Sensation white

Serene, ethereal and clutter free, if that sounds like your design brief then we have the definitive solution. A walk-in closet entirely dedicated to organising your wardrobe. No more rummaging around opening every door until you decide what to wear. In an instant you will be able to see everything at a glance. How good is that?

Dressing rooms and linen closets evoke an era when people could afford to be generous with space. Just cast your eyes over this intelligent design using our Sensation collection.

# Ambience pear

Could a bedroom ever be described as smart? This room could. It's a perfectly conceived design solution for an area that's short on space, but this bedroom isn't short on anything.

The cabin style bed tucks neatly against the wall, totally surrounded by copious amounts of storage. The dressing table can also double up as a desk. In fact, this room can be whatever you wish it to be; a home study, a day bed, a spare room or simply a room to let your child grow up with.
